Foreword

We are very pleased that Research and Evaluation in Education (REiD) Journal is presenting its first edition. We are also very excited that the journal has been attracting papers from various countries such as Laos, Madagascar, and Bangladesh. The variety of submissions from such countries will help the journal in reaching its aim in becoming a global initiative.

Research and Evaluation in Education (REiD) Journal contains and spreads out the results of master degree students' theses, doctoral degree students' dissertations, and also lecturers' researches, from various institutions.

The research results presented in this journal are not limited to the area of educational evaluation, but it comprises the results of research in education in a broader coverage, such as technology and vocation, social sciences, non-formal education, applied linguistics, learning technology, educational management, natural sciences education, mathematics education, with focuses on assessment and evaluation.

The editorial boards expect comments and suggestions for the betterment of the future editions of the journal. Special thanks go to the reviewers of the journal for their hard work, contributors for their trust, patience, and timely revisions, and all staffs of the Graduate School of Yogyakarta State University for their assistance in publishing this journal.

Yogyakarta, June 2015
