

RESEARCH AND EVALUATION IN EDUCATION
Vol. 1, No. 2, December 2015

The effectiveness of English teaching program in senior high school: A case study
--Alfred Irambona, Kumaidi

Developing a model of competency certification test for vocational high school students
--Pardjono, Sugiyono, †Aris Budiyo

Evaluation of the bridging course offered at a university to foreign students: Batches of 2012 and 2013
--Beatriz Eugenia Orantes Perez, Djemari Mardapi

The effectiveness of microcontroller instructional system through simulation program method by using trainer kit
--Edidas, Jalius Jama

The effectiveness of web-based interactive blended learning model in electrical engineering courses
--Hansi Effendi, Soenarto, Herminarto Sofyan

A formative assessment model of critical thinking in mathematics learning in junior high school
--R. Rosnawati, Badrun Kartowagiran, Jailani

The use of Malcolm Baldrige method for formulating strategic planning in the technological and vocational education
--Suharno, Sukanto, Sutarto

Implementation of digital learning using interactive multimedia in excretory system with virtual laboratory
--Heru Setiawan, Wiwi Isnaeni, F. Putut Martin Herry Budijantoro, Aditya Marianti

Foreword

We are very pleased that Research and Evaluation in Education (REiD) Journal is releasing its second edition. We are also very excited that the journal has been attracting papers from various countries such as Burundi and Mexico. The variety of submissions from such countries will help the journal in reaching its aim in becoming a global initiative.

Research and Evaluation in Education (REiD) Journal contains and spreads out the results of master degree students' theses, doctoral degree students' dissertations, and also lecturers' researches, from various institutions.

The research results presented in this journal are not limited to the area of educational evaluation, but it comprises the results of research in education in a broader coverage, such as technology and vocation, non-formal education, language teaching, learning media, educational management, natural sciences education, mathematics education, with focuses on assessment and evaluation.

The editorial boards expect comments and suggestions for the betterment of the future editions of the journal. Special thanks go to the reviewers of the journal for their hard work, contributors for their trust, patience, and timely revisions, and all staffs of the Graduate School of Yogyakarta State University for their assistance in publishing this journal.

Yogyakarta, December 2015
